Field of the Invention The present invention relates generally to an apparatus for cutting a waste product such as a disposable absorbent article, and more particularly to an apparatus for cutting a waste product. 2. Description of the Related Art In recent years, when using a sanitary napkin, a panty liner or the like, it is common practice to cause a user to fold the waste product once or twice and dispose it in an absorbent article container in which a waste product bag for containing the waste product is installed. The waste product bag is usually made of a plastic film, but may be made of other 82157476af
